Message from CEO

In 2004, ABE IRONWORKS Corporation had become Abex Corporation. We celebrated our 100th anniversary in 2018. Our main products are gear train systems for large industrial machinery. We produce from design, machining, assemble, test run, and ship from our factory.

We produce on “Build to Order” style with our advanced technical advices and abundant experiences to satisfy customer’s specifications and operations under any restrictions.

We supply satisfactions to customer to be recognized as a partner of the plant facilities.

The gear train system requires various technical know-how and necessary to accumulate, innovate them. We will focus our concentration to train our engineers, support acquisition of technical qualification, and improve work environment, aiming to be enriched and independent person.

CEO
Takuya Abe
